SKILLS

Back-end

.NET Core

C#

Node Js

Front-end

React Js

Redux

JavaScript

TypeScript

HTML; CSS

jQuery

Database / ORM

SQL Server

EF Core

MongoDB

Dapper

Firebase

DevOps / Misc.

Azure

Git

RESTful Web API

Agile (SCRUM)

xUnit

Docker

Referees available on request

EDUCATION

Bachelor of Information Communications Technology

Universal College Of Learning

02/2018 - 12/2020

Palmerston North

Majors

▣ Software Engineering

▣ Web/Mobile Application Development

New Zealand Diploma in IT Technical Support

Universal College Of Learning

02/2018 - 12/2018

Palmerston North

PROJECTS

Diet Tracker | Industry Project

A diet tracking web application that utilizes the NzFoodFiles database and FatSecret API. Users can search these extensive databases for food items, to track their nutrition. They can also use the in-built nutrient calculator to set goals, view a daily/weekly summary of their intakes, and export summaries in a csv format.

ASP.NET Core

C#

EF Core

SQL Server

jQuery

Azure DevOps

InterCity Clone

An InterCity clone web application built with React and .NET 5 Web API. Users are able to search for trips and book / manage them accordingly. The app uses Google cloud SQL as its database. The API has been containerized using docker and deployed on Azure, with the front-end deployed on netlify.

.NET 5 Web API

C#

React Js

TypeScript

EF Core

Docker

Cloud SQL

ATTRIBUTES

Strong Time Management

The progress of my projects have been documented using collaborative version control, showing my ability to deliver key features on time

Team Player

Successfully worked in an agile team environment multiple times during my degree, where communication and teamwork is essential

Aptitude for learning

Other than being dedicated to my studies, I have spent my spare time learning various technologies and applying those skills to create personal projects. Some of the recent ones have been linked on my website

Problem Solver

Re-created multiple popular web applications (InterCity, Countdown etc) with different tech stacks, and came up with my own solutions for each feature in a short time, while not compromising the end result
